Inspection Report Minerals Regulatory Program

April 17, 2007

Supervisor ROZ

Mine Name: Claim 35K

Operator Name: A G Hold, Associates (Jack Grover)

Permit number: S/041/013

Inspection Date: April 4, 2007

Time: 2:00 pm

Inspector(s): Rob Ernst, USFS; Lynn Kunzler, DOGM

Other Participants: Jack Grover, Don Johansen, Mike Johansen

Mine Status: Inactive

Elements of Inspection	Evaluated	Comment	Enforcement
1. Permits, Revisions, Transfer, Bonds	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
2. Public Safety (shafts, adits, trash, signs, highwalls)	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
3. Protection of Drainages / Erosion Control	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4. Deleterious Material	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5. Roads (maintenance, surfacing, dust control, safety)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6. Backfilling/Grading (trenches, pits, roads, highwalls,	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
7. Soils	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
8. Revegetation	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Purpose of Inspection:

This was a pre-reclamation on-site meeting to review reclamation requirements with the operator

Inspection Summary:

After the November 15, 2006 inspection, and the determination that this site has been inactive for 10 years or more, the operator was informed of the need to reclaim the site, or to go before the Board to request continued suspension of a mining operation. The operator subsequently decided to reclaim the site and requested we meet on site to review what would need to be done to complete reclamation.

Most of the area had volunteer vegetation established, however, there is significant garbage (mostly mining related) that needs to be cleaned up. The operator asked about the non-mining related garbage and was also told that he could remove it as well.

The area also needs some minor regrading on pads and dump slopes to blend slopes to match surrounding topography (most of the slopes are less than 6 feet high).

The highwall needs to be reduced and stabilized to eliminate safety concerns of falling rock.

Re-affected areas will need to be seeded. The Forest Service will provide a seed mix recommendation to the operator.

Conclusions and Recommendations:

The Operator concurred with the required reclamation work to be done. They have contracted with Nephi Sandstone to do the work. It is expected that the reclamation work will be completed by June. The operator will notify the Division and the Forest Service a few days before work begins so that a site visit can be scheduled prior to demobilization, to assure all work is completed satisfactorily.
